

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Large Dissecting Stand

A recent design which meets every requirement by reason of its large size and wide range of usefulness. Accommodates interchangeably Binocular Microscope body (illustrated), Monocular Erecting Body, using medium high power objectives, or simple lens in jointed arm—all focused by rack and pinion. The microscope bodies may be mounted on a sliding track, permitting the entire width of the stage to be covered.

Stage, 8x7 inches, is provided with glass and metal plates, $4\frac{3}{4}$ inches in diameter, and with adjustable background stops beneath.

With 38 and 19 mm. doublet lenses \$39.00

With Binocular Microscope body, 40 mm. objectives and 10X eyepieces, as illustrated above 103.50

Write for illustrated circulars.
